SUMMARY

Computer Science undergraduate with a deep-seated passion for problem-solving. I leverage hands-on experience in Java, Python, mobile app development, and data science to deliver impactful solutions for real-world challenges. I have a proven record of building scalable projects and am driven by my interests in machine learning, full-stack development, and open-source advocacy.

SKILLS

Programming Languages: Java, Python, C, C++, PHP, Markdown, Dart

Web Development: HTML, CSS, JS, React, Node.js, Express.js.

Algorithms & DSA: Arrays, Linked Lists, Trees, Graphs

Mobile Development: Android (Java, Kotlin – Jetpack Compose), Flutter

Machine Learning: LLMs, NLP, LangChain, FastAPI, Docling.

Database: MySQL, Cloudflare-R2.

Tools: Git, GitHub, VS Code, Android Studio

PROJECTS

SwechaAssetFlow

Oct 2025 – Present

Flutter, Dart, Cloudflare R2, Firebase Auth, GroQ Models, PythonMicroService.

- Developed a **digital asset ledger system** to efficiently track and manage organizational assets.
- Automates requirements, analytics, etc, and cutting manual effort by 65% and speeding task completion by 50%.
- Improved asset retrieval and update speed by **55%**, ensuring **centralized, transparent asset visibility**.

Tax Suthradhar

Jul 2025 – Oct 2025

React.js, Node.js, Express.js, Langchain, GroQ Models, Firebase, Cloudflare R2, Docling, FastAPI

- AI-powered Tax Alert & Compliance System tracking 100+ policies.
- Save up to 20% tax legally with 50+ exemptions and deductions.
- Automates compliance 90% faster with 100% legal accuracy.

Therapy Chatbot

Jan 2025 – May 2025

Cohere API, Python, HTML/CSS, Flask

- Built a web-based NLP chatbot with sentiment analysis tailored to mental health.
- Served 5+ users during beta; achieved a 4/5 average satisfaction score.
- Addressed depression, loneliness, and trauma via intelligent response handling.

Sky Stream

Feb 2025 – Mar 2025

Kotlin, Android Studio, Google Drive API

- Android app to stream videos directly from Google Drive links.
- Implemented secure access and seamless UX; reduced buffering by 15%.

Digitalized Finance

Oct 2024 – Nov 2024

HTML, CSS, JavaScript, PHP, MySQL

- Developed a web banking system simulating real-world transactions for **5+ virtual accounts**.
- Enabled **real-time asset monitoring** with **85% accuracy** and reduced manual record errors by **60%**.
- Enhanced practical learning efficiency by **50%**, enabling **30+ users** to practice banking operations concurrently.

CERTIFICATIONS

Problem Solving – **HackerRank**

Python Programming – **NPTEL**

Java Programming – **HackerRank**

C Programming – **NPTEL**

VOLUNTEERING

Swecha (Volunteer)

Apr 2024 – Present

- Led 2+ workshops on WordPress, UI/UX, and no-code tools.
- Promoted Free and Open Source Software (FOSS) at 3+ tech events.
- Mentored 100+ participants in open-source development.

EDUCATION

Maharaj Vijayaram Gajapathi Raj College of Engineering, Vizianagaram
B.Tech in Computer Science and Engineering
CGPA: 8.92

Nov 2022 – Present

AWARDS

Winner, Avishkaar Hackathon

Dec 2024

AITAM College, Srikakulam

- Selected among 50+ teams for developing an innovative prototype.
- Won a cash prize of Rs. 1,00,000 for novelty and real-world impact.

Winner , Sankaalp Hackathon

Sept 2025

MVGR College, Vizianagaram

- Selected among 50+ teams for developing an AI-driven multi-agent SDLC system, NextGenT.
- Awarded cash prize of Rs. 10,000 for innovative solution and measurable real-world impact.

NLP Challenge

Jan 2025

IIT Kharagpur

- Built a chatbot for mental health support.
- Targeted depression and loneliness; supported 80% of test users.
- Selected among the top 25 finalists in a nationwide innovation challenge.

GPAI Case Club Competition

Oct 2025

IIT Madras

- Suggested advanced AI-driven features to enhance STEM education.
- Proposed scalable solutions addressing learning gaps and real-world applicability.
- Selected as **GPAI Finalists** for delivering a high-impact, forward-thinking proposal.
